PERSONAL PROJECTS

Ping Pong Gamae Project | By Coding Ninjas

- Visit Project :- <https://krushnachandranayak.github.io/Pingpong-game-useing-javascript/>
- Techniques Used :- HTML, CSS, javascript
- Every round should start when the 'Enter' key is pressed. (You can use another key as well)
- The rods will only move horizontally using the 'a' and 'd' keys. (You can use other keys as well)
- The losing rod will get the ball for the next match and the rods and ball will move to center. The score will be counted from the start of every match.

Alarm-clock project | By Coding Ninjas

- Visit Project :- <https://krushnachandranayak.github.io/Alarm-clock/>
- Techniques Used :- HTML, CSS, javascript
- Set alarm when alarm time and current time match alarm sound beep.

Habit-Tracker Project | By Codeing Ninjas

- Visit Project :- <https://habit-tracker-n44z.onrender.com>
- Techniques Used :- EJS, CSS, Node js
- A web application which help you to create, update, delete and track your habit on daily basis. It is user specific app, which mean a user can track their habit, and mark it as done , or not done.

Employee-Review-System Project | By Codeing Ninjas

- Visit Project :- <https://employee-review-system-33aq.onrender.com>
- Techniques Used :- EJS, Node js
- This Employee review web application is created for employees to submit feedback toward each other's performance. User's could have either "employee" or "admin" role. There are two dashboard pages based on the role of the employee those dashboard pages will be rendered, User with role of admin can assign employees to participate in review of other employees. Employees can only submit feedback required by assigned reviews.
